**Subject:** SAFRR update???

My name is doug ryan and i reside at 74 sir francis drake blvd in ross.

Please help me understand what is going on with SAFRR. Brian Colbert stated in definitive terms he has spoken with a Ross representative and they are onboard with demolishing BB2 and putting up the baffles prior to mitigation being performed.

As we all know, it is physically impossible to remove one object from a stream and try to replace it with something that provides exactly 100% same results with flood waters. So when it rains, all entities participating in this charade will be sued and will lose.

Where is the FEMA-required mitigation? What is the status of the CLOMR?

I plan to ask very specific questions of county reps on Thursday and I am expecting your full support.
