Town Council,

I'm writing regarding the proposed Ross Common renovation project. First and foremost, Ross School deeply values our longstanding partnership with the Town and sincerely appreciates the collaborative relationship we have established.

We recently learned that the Town is considering improvements to Ross Common to address drainage and other site concerns. Should the Town choose to move forward, Ross School would welcome the opportunity to collaborate. The School is fully supportive of efforts to enhance and restore the field, and we are truly grateful for the opportunity to access Ross Common every school day, allowing our students to engage in physical education, as well as enjoy the outdoor space for games and free play during non-instructional time.

Should the Town proceed with a renovation project, the School would greatly appreciate the opportunity to participate in the conversation and provide input on the project's scope and details.

Thank you for your continued partnership and consideration.

David Rice

Ross School Superintendent
